Subject: Walker Road – Traffic Data Collection Program

INTRODUCTION

This memorandum has been prepared to provide a summary of the results of a traffic data collection effort completed on Walker Road and Banks Road in the Town of Swampscott. The traffic data was obtained at the request of the Department of Public Works to determine the feasibility of converting Walker Road from two-way traffic to one-way westbound traffic. The weekday and weekend volume data serviced along each roadway is presented below with the raw count data provided as backup in the Attachment.

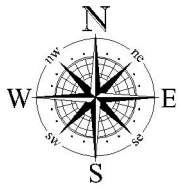

TRAFFIC DATA

Existing traffic flow characteristics along Walker Road and Banks Road were obtained from a traffic counting program completed by BETA in conjunction with Accurate Counts. Automatic traffic recorder (ATR) counts were conducted on each approach leg to the intersection of Walker Road with Banks Road. The location of each count is presented in the Attachment for reference. Walker Road intersects Banks Road to create an unsignalized, four-way off-set junction under All-Way stop control. ATR counts were collected for a 7-day period between Wednesday October 21, 2020 and Tuesday October 27, 2020 to obtain data for both the weekday and weekend periods. It should be noted that this data has been collected in a period that has seen uncharacteristic traffic conditions over the last eight (8) months due to the on-going pandemic including phased business and travel restrictions in place. The existing traffic volumes collected may not be typical of the daily traffic conditions along these roadways where daily volumes could be higher than recorded.

Based upon the ATR data obtained, Walker Road east of Banks Road was found to service an Average Daily Traffic (ADT) volume of approximately 4,400 vehicles per day on a typical weekday and 3,920 vehicles per day on a typical weekend. West of Banks Road, Walker Road was found to service an Average Daily Traffic (ADT) volume of approximately 3,000 vehicles per day on a typical weekday and 2,570 vehicles per day on a typical weekend. On a typical weekday along Walker Road, traffic volumes begin to increase at 6:00 AM with no defined morning peak hour as the volumes consistently increases until the afternoon peak of approximately 380 and 285 vehicles serviced between 4:00 and 5:00 PM, east and west of Banks Road, respectively. On a typical weekend along Walker Road, traffic volumes begin to increase at 6:00 AM with no defined morning peak hour as the volumes consistently increases to until the midday peak of approximately 360 and 245 vehicles serviced between 11:00 AM and 12:00 PM, east and west of Banks Road, respectively; thereafter the volume decreases consistently with no defined afternoon peak hour.

Banks Road, north of Walker Road, was found to service an Average Daily Traffic (ADT) volume of approximately 1,280 vehicles per day on a typical weekday and 1,035 vehicles per day on a typical weekend. Banks Road, south of Walker Road, was found to service an Average Daily Traffic (ADT) volume of approximately 3,160 vehicles per day on a typical weekday and 2,780 vehicles per day on a typical weekend. Similar to Walker Road, traffic

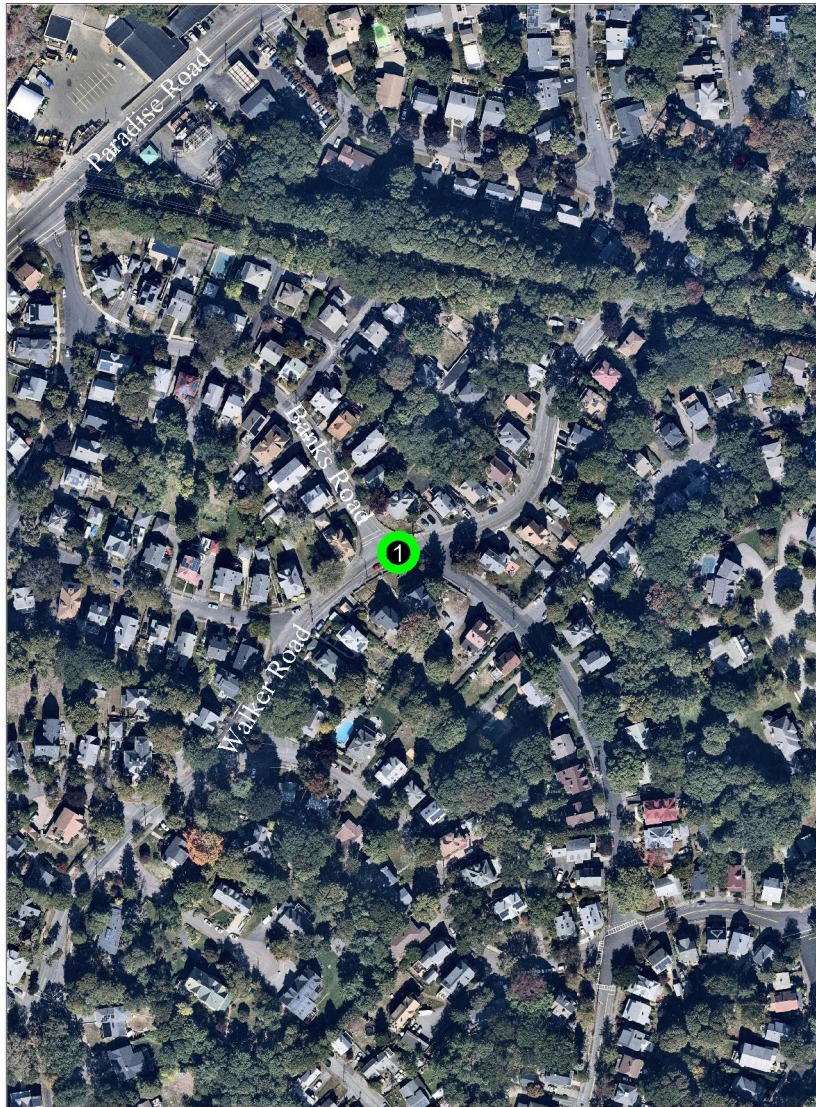

volumes on a typical weekday along Banks Road begin to increase at 6:00 AM with no defined morning peak hour as the volumes consistently increases until the late afternoon peak of approximately 120 and 290 vehicles serviced between 4:00 and 5:00 PM, north and south of Walker Road, respectively. Similar to Walker Road, traffic volumes on a typical weekend along Banks Road begin to increase at 6:00 AM with no defined morning peak hour as the volumes consistently increases to until the midday peak of approximately 105 and 270 vehicles serviced between 11:00 AM and 12:00 PM, north and south of Walker Road, respectively; thereafter the volume decreases consistently with no defined afternoon peak hour. The figure on the following page depicts the weekday and weekend average peak hour and daily volumes along Walker Road and Banks Road. Complete count information can be found in the Attachment.
